

# NANO COAT

Water Based  
Nano Technology  
Deeper Penetration  
Better Shielding  
Longer Protection  
Environmentally Friendly

## CPS-1000 : : Ceramic & Porcelain Protective Sealer

### Introduction / Main features

- Ceramic or porcelain looks very smooth, but under microscope, we can find many tiny pores on the surface & it is quite rough
- Ceramic & Porcelain Protective Sealer is designed to fill up all the pores, because of its nano size structure
- Ceramic & porcelain coated with NanoCoat Coat will have a lot smoother & clearer surface therefore help to protect it against water, oil, dust, etc
- Water and dust repellent property
- Nano size particle - deeper penetration, better bonding, better protection
- Water based product - easy cleaning, less odor, non-flammable, quick dry, environmentally safe

### Application

Mainly for ceramic & porcelain such as: bath tub, sink, toilet bowl, ceramic, marble, etc

### Coverage

- 15 m<sup>2</sup> / kg roughly

### Statement:

This brochure is based on our testing and experience and can be used as a construction guideline. Given the fact that many factors can affect the end result, we are only responsible for the quality of the product. As the technological progressing, we reserve the right to modify this specification without notice.
