

MS-9900 : : Marble Sealer

Several biggest enemy of marble are tea, soy sauce, wine, vinegar and any acid liquid. The above picture on the left was when both treated and non-treated surface were exposed to soy sauce. After several hours, the right hand side picture shows the treated surface leave no mark.

We have tested 13 different liquid that may cause mark on marble, and the result was none of the liquid cause mark on the treated marble.

Introduction / Main features

- Penetrate deep and fill up all pores in the marble, ceramic or tiles and even on paint
- Protect the shining and natural color of the marble
- Semi penetration of about 1-2mm, water and oil repellent
- On wall paint, MS-1800 enhance the paint to be smoother and therefore protect against water, oil, dusk, dirt and etc
- Nano size particle - deeper penetration, better bonding, better protection
- Water based product - easy cleaning, less odor, non-flammable, quick dry, environmentally safe

Application

Cement tile, marble, granite, exterior building paint, natural stone and others

Coverage

15-25 m2 / kg roughly. Coverage rates will vary depending on density of the marble

Technical Index

No	Detected Items	Performance Index
1	Appearance	Colorless transparent liquid
2	Density (g/m ²)	> 1.02
3	Viscosity (s)	> 10.0
4	Penetration Depth (mm)	> 2.0
5	Water Absorption (48h)	< 300%

Warning

- Color changes may appear on several types of marbles. Therefore, it is always best to do testing prior to application.
- Indoor application if best.

Statement:

This brochure is based on our testing and experience and can be used as a construction guideline. Given the fact that many factors can affect the end result, we are only responsible for the quality of the product. As the technological progressing, we reserve the right to modify this specification without notice.
